Education

Ph.D. Economics, New York University, 2019–present.

MSc. Economics, London School of Economics and Political Science, 2018.

MA (Hons.) Economics and Mathematics, University of Edinburgh, 2017.

Past Employment

Macroeconometric Research, Fulcrum Asset Management, London, U.K., 2018–2019.

- Evaluating various dynamic factor models for forecasting macro time series; summarizing model output for the chairman's weekly Financial Times columns on developments in the global economy.

Research Fields

Econometrics, Causal Inference.

- Treatment effect inference in randomized experiments or with observational data: Compliance and non-compliance in experiments, quasi-experimental methods, causal inference given network effects, propensity score matching and IPW.
- Policy learning with experimental data.
- Moment-based estimation (IV, GMM, SMM) for structural analysis/endogeneity.
- Inference with exogeneous and endogenously stratified samples; clustering.

Teaching Experience

Introduction to Econometrics (ECON-UA 266), Fall 2021, Summer 2022.

Analytical Statistics (ECON-UA 20), Fall 2022

Applied Microeconomics II (ECON-GA 4062), Spring 2023, Fall 2023

Other Information

Programming skills: Julia (proficient), Matlab (proficient).
